

VMware Lab Manager Jumpstart

Overview

This on-site consulting engagement is designed for development organizations wanting to optimize their software development and test infrastructure by speeding cycle times, cutting costs and increasing the quality of delivered software systems. This proof-of-concept installation will help you get started quickly and leverage the capabilities of VMware Lab Manager.

Deliverables

- Standard on-site installation of VMware Lab Manager using VMware Infrastructure 3 (up to two VMware ESX Server hosts)
- Interactive proof-of-concept workshop focusing on usage, administration and operations
- Best practices and knowledge transfer, along with a guided tour of an on-site installation for a maximum of 5 participants

Target Audience

- IT administrators responsible for setup and maintenance of the VMware Lab Manager system
- Quality assurance and system engineers who are responsible for test builds and test system administration

Roles and Responsibilities

- **VMware Certified Professional Consultant**
Conducts workshop, which includes installation, best practices knowledge around configuration, administration and ongoing management presented over the course of the workshop
- **Customer Project Manager**
Plans and coordinates all IT functions
- **Customer Systems Administrator**
Responsible for server hardware, storage, and networking
- **Customer Server Administrator**
Responsible for operating system and applications
